anushkadhiman101@gmail.com | 9027996957 | [LinkedIn](#) | [GitHub](#)

Education

VIT Bhopal University, Bhopal
B.Tech in Computer Science (AI & ML)
Delhi Public School, Meerut
Class X and XII

Sep 2023 – Jun 2027

Experience

Infosys Springboard — AI/ML Intern (Remote)

Nov 2025 – Dec 2025

- Built **AI-ImpactSense**, an ML-based earthquake impact prediction system using supervised learning models.
- Performed data preprocessing, feature engineering, and dataset structuring to improve model reliability.
- Implemented end-to-end ML pipeline including training, evaluation, and hyperparameter tuning.
- Deployed model using **Streamlit** with real-time predictions and risk visualization.

Virsis — Project Intern (Remote)

Jan 2025 – Sep 2025

- Improved organic traffic through SEO strategies and keyword optimization.
- Analyzed web traffic data and generated performance reports with actionable insights.

Skills

Programming: Python

Computer Vision: Object Detection (YOLOv8), Image Classification, OCR (Tesseract), Image Processing

Machine Learning: Supervised Learning, Deep Learning, Model Optimization, Feature Engineering

Frameworks: PyTorch, TensorFlow, Keras, OpenCV, Scikit-learn

Data & Pipelines: Data Preprocessing, Data Augmentation, Dataset Annotation, Pipeline Development

Systems & Deployment: Real-time Systems, Multi-module Architecture, Streamlit, Flask APIs

Concepts: Computer Vision Pipelines, Model Evaluation, Hyperparameter Tuning, Event-driven Systems

Projects

Netra-AI | Real-Time Assistive Navigation System

[GitHub](#)

- Designed and developed an end-to-end **computer vision system** integrating multiple real-time modules.
- Implemented **YOLOv8-based object detection** achieving ~90% accuracy at 50–90ms/frame.
- Built custom-trained **YOLO model** for Indian currency recognition with ~87% accuracy.
- Integrated OCR (Tesseract) and image processing pipelines for real-time text extraction.
- Engineered a multi-module pipeline including obstacle detection, fall detection, OCR, and navigation.
- Developed BFS-based navigation system and voice-driven interaction for hands-free operation.

Tech Stack: Python, PyTorch, OpenCV, YOLOv8, Tesseract OCR

AI-ImpactSense | Earthquake Impact Prediction System

[Website](#) | [GitHub](#)

- Developed ML models to predict earthquake impact severity with structured datasets.
- Performed data cleaning, preprocessing, and feature engineering for improved performance.
- Built a complete ML pipeline with evaluation metrics and visualization.

Tech Stack: Python, Pandas, Scikit-learn, Matplotlib, Streamlit

Dog Breed Classifier | Deep Learning

[GitHub](#)

- Built a multi-class image classification model using CNNs with TensorFlow/Keras.
- Applied image preprocessing and data augmentation to improve generalization.
- Deployed model for real-time inference via web interface.

Tech Stack: Python, TensorFlow, Keras, OpenCV

Certifications

- Applied Machine Learning in Python — University of Michigan (Nov 2025)
- Job Simulation — Forage Academy (2024)
