Education

VIT Bhopal University, Bhopal	Sep 2023 – Jun 2027
B.Tech in Computer Science (AI & ML)	CGPA: 8.01
Delhi Public School, Meerut Class X (CBSE)	2020 – 2021
Delhi Public School, Meerut Class XII (CBSE)	2022 – 2023

Technical Skills

Languages: Python, Java, JavaScript

AI/ML & Agentic: LLMs (OpenAI, Gemini, Groq), Agentic AI, RAG, LangChain, LangGraph, Fine-tuning, Prompt Engineering, NLP, Computer Vision

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, OpenCV, YOLOv8, FastAPI, Streamlit, Sentence Transformers

Databases & Vector Stores: MySQL, MongoDB, SQLite, ChromaDB

Tools & Automation: Git, Docker, Zapier, n8n, REST APIs, Tesseract OCR

Experience

Infosys Springboard – AI/ML Intern (Remote) Nov 2025 – Dec 2025 [Live](#) [GitHub](#)

- Built **AI-ImpactSense**, an ML-based earthquake impact prediction system achieving **85%+** accuracy across 3 supervised learning algorithms.
- Engineered a data preprocessing and feature engineering pipeline on **5,000+ records**, reducing noise and improving model reliability by **20%**.
- Deployed end-to-end ML pipeline with hyperparameter tuning via **Streamlit**, enabling real-time risk predictions across **4 severity levels**.

Virsis – Project Intern (Remote) Jan 2025 – Sep 2025

- Improved organic traffic by **30%** through SEO strategies, keyword optimization, and on-page content restructuring across **5+ web pages**.
- Analyzed web traffic data using analytics tools, generating **weekly performance reports** with actionable insights for **3+ active campaigns**.
- Tracked key metrics including bounce rate, CTR, and session duration, contributing to a **20%** improvement in user engagement.

Projects

TelecomIQ | AI-Powered Telecom Support Intelligence Platform [Live](#) | [GitHub](#)

Tech Stack: Python, LangChain, ChromaDB, Groq (Qwen3-32B), Streamlit, Sentence Transformers

- Built a **multi-source RAG pipeline** unifying FAQ repositories, technical documentation, and historical support tickets into a single semantic search engine across **3 ChromaDB collections**.
- Implemented **real-time semantic search** using sentence-transformer embeddings enabling intent-based retrieval beyond keyword matching, significantly improving answer relevance.
- Engineered a **ticket intelligence layer** surfacing previously resolved issues with **source-attributed responses** (FAQ/guide/ticket), reducing hallucinations and improving support transparency.

ShopperAI | AI-Powered Grocery Shopping Agent [Live](#) | [GitHub](#)

Tech Stack: Python, SQLite, Streamlit, LLM-based NL Router

- Built an **end-to-end agentic shopping system** with natural language intent classification, routing queries across search, filtering, rating aggregation, and checkout over a **32-product SQLite catalog**.
- Engineered a **real-time analytics pipeline** with parameterized batch subqueries for dynamic AVG/COUNT aggregation, eliminating SQL injection risks via auto-generated placeholders.
- Designed a **freeze-frame checkout ledger** locking prices at confirmation time, deployed via interactive **Streamlit UI** with organic product scoping and multi-category filters.

Netra-AI | Real-Time Assistive Navigation System [GitHub](#)

Tech Stack: Python, PyTorch, OpenCV, YOLOv8, Tesseract OCR

- Designed an end-to-end **computer vision system** with **5 real-time modules**: obstacle detection, fall detection, OCR, currency recognition, and navigation for visually impaired users.
- Implemented **YOLOv8-based object detection** achieving **~90%** accuracy at **50–90ms/frame** with custom-trained model for Indian currency recognition (**~87%**).
- Developed **BFS-based navigation** and voice-driven interaction, enabling hands-free real-time guidance with low-latency audio feedback.
